Summary

I am javascript developer with proven experience in development, optimisation and testing over the past year. I have finished internship in such companies: Soft Serve Academy and EPAM University. I had experience in developing flexible, responsive websites and web applications, entire application and application components. I had chance to participate in web development process, taking part in planning, designing/developing, troubleshooting, debugging and implementing software code for website components. I am going to become full-stack developer. I am planning to deep dive into learning new software development technologies.

Education

Kharkiv National University of Radio Electronics

2012 - 2017

Department of metrology and technical expertise

Master in specialization "Metrology and information-measuring technologies"

SoftServe IT Academy Kharkiv
